A-319

ULTRASONIC CLEANER

- Water Based alkaline cleaner with powerful solvency on oil and soil matter
- Effectively and rapidly remove carbonized deposits, grease and oil
- Biodegradable
- Non-Flammable
- Economical cleaners

PRODUCT DESCRIPTION:

A-319 ULTRASONIC CLEANER is specially developed for ultrasonic cleaning applications. It is a water-based alkaline cleaner with exceptional solvency power on oil and soil matter.

In most general cleaning applications, there will be carbon residues and other solid deposits left behind. In these cases, the use of ultrasonic sound waves in combination of our special cleaning agent gives excellent results.

APPLICATION:

For heavy contamination, degrease the components with APEX-303 ECOCLEAN prior to using ultrasonic cleaner. Dismantle the equipment to be cleaned, place the components in the bath. Kindly ensure that the elements are completely immersed and kept separate.

A-319 ULTRASONIC CLEANER should be used in a 5 – 25% solution in water at a temperature of 50°C – 70°C. We will recommend a cleaning time of 5 – 30 minutes, but longer if necessary. Upon completion, remove the elements from the bath and spray it with plenty of water.

The cleaning solution has to be renewed and the bath cleaned regularly to ensure the next batch of equipment can be cleaned effectively.

A-319 ULTRASONIC CLEANER is suitable for cleaning engine components like fuel and lube oil filters, pumps components, inlet and exhaust valves.

Product may attack light metal alloys at concentrated solutions.

We advise to test on zinc, aluminium and magnesium before usage.

PHYSICAL PROPERTIES

Appearance	: Clear
Relative Density	: 1.0 – 1.10
Form	: Liquid
pH	: 11.0 – 12.0

Packaging : Supplied in 12 x 1 ltr non-returnable containers.
